

# The Big ONE!

Redland's story began in September 2008 out of the desire to create a new era consulting firm. Today's marketplace recognizes that old style firms with under-utilized management and lavish overhead are a dying breed. This inevitability from the new economy has led to the success of firms like Redland that offer superior quality, experience and greater value for less.

As Redland celebrates its 1st Anniversary we sincerely thank our fans for supporting our growth this past year! We're equally committed to you and your continued success!
